

ECI Group launches new consultancy services unit

Manchester, United Kingdom/Baton Rouge, Louisiana, USA, December 3, 2024 - ECI Group, a world leading technology licensor and engineering services provider for the polymer and advanced recycling industries, announces the launch of its new consultancy services unit: ECI Group Consultancy Services.

ECI Group Consultancy Services will provide specialist consultancy services to the polyolefins sector, delivering technology support and plant optimization services to help clients achieve their profitability, safety, and sustainability goals. The services will cover a broad range of polyethylene and high-pressure copolymer technologies from the production of LDPE, EVA, Ethylene Acrylates copolymers, Polyolefins Elastomers, Polyolefins Plastomers, Linear Low-Density Polyethylene and High Density Polyethylene, to plastic recycling and more.

Francisco Larenas has been appointed as ECI Group's Consultancy Services Director and he will be responsible for leading the new business unit. Francisco has over 20 years of experience in the international process industry, specialising in the polymer and petrochemical sectors. He has a demonstrated experience in the operation of petrochemical plants, the execution of large capital projects, polyethylene technology, plant optimization and leadership of high-performance teams.

Francisco will lead a team of Subject Matter Experts who each bring decades of experience in polyolefins and expertise across all aspects of operations, maintenance, training and capital projects, as well as access to ECI Group's full capability in technology and engineering for these sectors.

"We are delighted to announce the launch of ECI Group Consultancy Services which will allow us to provide focussed, specialist services to our clients in the polyolefins sectors," said Joaquin Flores, President and CEO of ECI Group. "ECI Group has a wealth of knowledge to share, built from decades of experience in the polyolefins industry and our experience of leading pioneering polyethylene projects. I am confident that with Francisco's expert leadership, ECI Group Consultancy Services can drive our business forwards to becoming the global reference for polyolefin engineering and technology."

Francisco Larenas said: “I am excited to take on this new role within ECI Group and look forward to leading the ECI Group Consultancy Services unit, working alongside our exceptional group of experts to deliver top-tier consultancy services and create value for our clients.”

About ECI Group

ECI Group comprises Engineers and Constructors International, Inc., headquartered in Baton Rouge, Louisiana, and Simon Carves Engineering Ltd., headquartered in Manchester, UK, as well as the International Technical Excellence Center (ITEC). With its history stretching back over 146 years to the formation of Simon Carves in 1878, ECI Group provides world-leading technology and engineering solutions for polymers around the world, offering proprietary technology licenses for high-pressure polyethylene and multi-discipline engineering services that cover the full lifecycle of the project and the operating plant.
